## Exact Manages CCTV System from a Desktop PC

Exact is a leading manufacturer of software for accounting, human resource management (HRM), customer relationship management (CRM,) e-business and enterprise resource planning (ERP). Exact software is used in 126 countries and available in 26 languages. Exact Holding N.V. has been listed on the Official Market of Euronext Amsterdam Stock Exchange since June 1999.

The head-office of Exact is located in Delft (Netherlands) where Mr. Middelkoop, the Support Manager of Exact Holding N.V., is responsible for the Video Surveillance.

### ● CCTV Management

As a technology driven company Exact prefers to work with network based applications for a higher efficiency. Therefore Exact was looking for an Internet Technology based Video Surveillance solution enabling to easily manage CCTV from any desktop PC.

### ● Experience

“We have tried several networked CCTV solutions. Our experience with these products was that they were limited in features and they required intensive maintenance.

WebCCTV NVR, however, meets our requirements very well. The product is easy to use and therefore no training was required for the operators to start using it.

There’s also no maintenance on the product and after working with it for quite a long time we have experienced that it’s very stable”, said Mr. Middelkoop.
